# 622 TESLA

TESLA 622 A RADIO RECEIVER is a new model of the latest series of TESLA superhets which we have prepared for you for this season. It will fully satisfy you by its appearance, perfect reception on all wavebands and efficient technical design.

It is especially recommended if extra good quality reception is required in short wave ranges which are spread on this superhet in three bands from 13 to 150 metres. Completed with long and medium waves and being resistant to all climatic influences, this universal type receiver gives excellent service in all parts of the globe. It is provided with an optical tuning and wave range indicator and a socket for the extension speaker and gramophone pickup.

The cabinet of up-to-date design is made of highly polished wood and all its parts are perfectly matched. Its simple elegance will please you and tastefully supplement the furnishings of your room.
